

STIR Program Purchases

All purchases made by the City of West Sacramento (City) including any purchases of civic technology products related to the San Francisco Mayor's Office of Civic Innovation's Startup in Residence (STIR) project, must comply with [West Sacramento Municipal Code Section 3.04](#), [Administrative Policy IV-B-1](#), and applicable law.

Participation with the City on a STIR challenge does not guarantee that the City will purchase the work product following the challenge period. However, the City did purchase a software product produced under STIR 2016, and will consider acquiring software produced through the 2017 STIR program, subject to funding availability and the City's needs.
